

CASE Tool Alternatives

Sparx Enterprise Architect

- Latest Version: 13, Build 1310
- Trial available

Provides tools and workflows for the Business Solutions group, and our Systems group. The feature set is too numerous to list here. It has earned many accolades around the world. They also carry many resources to teach and on-board new users.

Visual Paradigm

- Latest Version: 14
- Trial available

A sleek and modern software set with many of the tools project and systems managers, designers, engineers, and business solutions teams need to carry out agile and enterprise functions. A key feature is integration into the IDE of choice for developers.

CASEXpress

- Latest Version: 1.0b
- Free

This is a Linux based solution for systems designers and developers. While it's scope and feature set is smaller than the previously described CASE tools, it is an open source project with the Apache license and available to anyone. It can also be easily contributed to if any one feature is desired or a bug needs fixing.
